

PATRONE 03 PENDANT // BRASS

The ambition was to create a simple and timeless pendant with a modern and industrial feel. The Patrone Collection has an expression that fits into any domestic setting. Group them together or simply choose one Patrone pendant for a consistent look. The fixture emits glare-free light directed downwards, perfect for the kitchen, the dining table or anywhere a comfortable atmosphere is wanted.

Brass is a living material that changes over time. Patina is naturally formed in brass when exposed to the environment. This means that from the day it is received, the material will continually patinate and change.
